

SKILLS

Data Analytics:

Pandas, NumPy, SQL, Power BI, EDA, RFM Analysis, Statistics

AI & ML:

Python, PyTorch, scikit-learn, Generative AI (LLMs), NLP

Frontend & 3D:

React, Vite, Three.js, WebGL, GLSL Shaders, HTML5/CSS3

Tools & CI/CD:

Git, GitHub, Cursor AI, Netlify, Render, MongoDB Atlas

CERTIFICATIONS

Google Data Analytics Professional Certificate — Coursera (Aug 2026)

Front-end AI Engineering — FlyRank Corp. (Sep 2026)

AI Fluency: Framework & Foundations — Anthropic (Sep 2026)

Google AI Professional Certificate (Jun 2026)

Fundamentals of Building AI Agents — IBM/Coursera (Aug 2026)

Certified in Gen AI — AKTI, Cohort C5 (Sep 2025)

HP LIFE — AI for Beginners (Jun 2026)

Essentials of MS Excel — UniAthena/CIQ (Aug 2026)

LANGUAGES

English (Professional)

Urdu (Native)

ACHIEVEMENTS

CUST Hackathon 2026 — Certificate of Achievement (Jun 2026)

Big Data Analytics in Life Sciences — BioCode Innovators (Aug 2026)

RIZWAN ALI KHOSO

Software Engineer | AI & Data Analyst

Street No.10 G.7/2, Islamabad | +92 334 1911731 | rkhoso17@gmail.com | github.com/rizwan123-ui | linkedin.com/in/rizwan-ali-khoso

PROFILE

Recent Software Engineering graduate of Capital University of Science & Technology (CUST) with hands-on experience in Data Analytics, Artificial Intelligence, and Front-end AI Engineering. Skilled in Python, SQL, Pandas, Power BI, data cleaning, EDA, statistical analysis, and machine learning. Experienced in customer segmentation, sales forecasting, and building data-driven web applications. Seeking an entry-level Data Analyst role to apply strong analytical and technical skills to real-world business problems.

WORK EXPERIENCE

FlyRank Corp.

Front-end AI Engineering Intern (Cert ID: FR-D11-5F642-EA708)

- Built and deployed interactive WebGL interfaces using React, Vite, Three.js, and custom GLSL fragment shaders.
- Integrated AI workflows (Cursor AI, Gemini) for rapid shader prototyping, geometry calculations, and automated testing.
- Enforced performance budgeting by capping DPR at 2.0 to eliminate GPU thermal throttling on high-DPI displays.

AKSA-SDS, Islamabad, Pakistan

AI & Machine Learning Intern

- Built and evaluated ML models including Regression, Decision Trees, KNN, Naive Bayes, and K-Means.
- Performed data cleaning, preprocessing, and Exploratory Data Analysis (EDA) using Python libraries.
- Implemented NLP techniques including text classification and topic modeling; trained basic neural networks using PyTorch.

Strive Trust, Islamabad — Volunteer

- Supported disability awareness outreach at government schools, promoting inclusivity for individuals with limb differences.

PROJECTS

Online Retail Data Analytics & Business Forecasting Project

[Python](#) | [Pandas](#) | [NumPy](#) | [SQL](#) | [Power BI](#) | [Statistics](#) | [ARIMA](#) | [GitHub](#)

- Performed data cleaning, preprocessing, and EDA on 541K+ online retail transactions, including outlier detection and feature engineering to uncover customer, product, and sales trends.
- Used SQL for data filtering, aggregation, and monthly sales analysis; built an interactive Power BI RFM dashboard with KPIs, customer segmentation, and Top 10 customer analysis.
- Conducted hypothesis testing (Independent T-Test) and built an ARIMA time-series model to forecast monthly sales, evaluating accuracy with MAE and RMSE.

3D Interactive WebGL Configurator (Capstone Project)

[React](#) | [Vite](#) | [Three.js](#) | [GLSL Shaders](#) | [Netlify](#)

- Engineered an interactive 3D product customization tool featuring dynamic lighting, custom GLSL material shaders, and real-time mesh wireframe controls.
- Managed WebGL canvas lifecycles and explicit memory disposal inside React hooks to prevent GPU memory leaks.
- Achieved 90+ Lighthouse performance score and full WCAG 2.1 AA accessibility compliance across modern desktop and mobile viewports.

Canvio - FYP Management System (Final Year Project)

[Python](#) | [MongoDB Atlas](#) | [Render](#) | [CUST](#)

- Designed and developed Canvio, a web management system to help CUST track and handle student Final Year Projects.
- Built backend in Python with MongoDB Atlas authentication and email notifications; deployed live on Render.

Retail Chain Profitability & Inventory Risk Dashboard

[Power BI](#) | [DAX](#) | [Data Modeling](#) | [Data Visualization](#)

- Developed an interactive Power BI dashboard to analyze sales, profitability, inventory levels, and store performance.
- Built KPIs for Sales Target Achievement, Profit Target Achievement, Current Stock, and Days of Inventory Remaining.
- Created Sales vs Target and Profit vs Target monthly analysis with interactive Region and Store filters.
- Implemented conditional formatting and stockout-risk identification to highlight inventory risks.
- Used DAX measures and data modeling to support interactive business analysis.
